***HARDY HECK MOORE & MYERS, INC. HISTORIC RESOURCES SURVEY  
NAVAL WEAPONS INDUSTRIAL RESERVE PLANT DALLAS, DALLAS  
COUNTY, TEXAS. NORTH CHARLESTON, SOUTH CAROLINA: SOUTHERN  
DIVISION, NAVAL FACILITIES ENGINEERING COMMAND, NOVEMBER  
1999.***

The Historic Resources Survey of Naval Weapons Industrial Reserve Plant (NWIRP) Dallas is a comprehensive historical and architectural inventory of all extant properties at the federally owned plant. Hardy Heck Moore & Myers evaluated 159 government-owned buildings and structures within the plant, focusing on those resources that were 50-years old. The contractor recorded all physical features of the resources as well as considered their relative historical and architectural significance according to federal guidelines established by the National Historic Preservation Act of 1966. Buildings and structures constructed between 1949 and 1991 were also considered for any exceptional significance associated with the Cold War Period. HardyHeckMoore & Myers determined that Facilities 1, 6, and 16 were eligible for the National Register of Historic Places (NRHP) under Criteria A for its historical significant, not their physical attributes. Facilities 1, 6, and 16 contributed significantly to manufacturing activities during World War II. The remaining extant resources were determined ineligible for the NRHP because of their lack of significance or integrity and/or they lack exceptional significance, as defined by federal regulations.

The December 2000 Update Historic Resources Survey of Naval Weapons Industrial Reserve Plant (NWIRP) Dallas contains the same comprehensive historical and architectural inventory that was originally printed in the November 1999 report. Following completion of the first survey, the lessee of NWIRP Dallas changed from Northrop Grumman to Vought Aircraft Industries, Inc. HardyHeckMoore & Myers updated the historic context of the November 1999 report to reflect the change in lessee at the plant. The conclusions of the report did not change with the update survey

– the three extant properties at the federally owned plant determined eligible for the NRHP are still considered eligible.
